Arjen Broens

Job Title: Geospatial Engineer

Welcome

Say hello to Arjen, the newest member of the Gow Groundworks family and our new Geospatial Engineer.

Arjen has 47 years of experience and has been doing Geospatial Engineering since he was 16 years old!

Please join us in welcoming Arjen to the team!

Skills

- Strong problem-solving and analytical skills
- Clear communication and visualisation abilities
- High attention to detail and data accuracy
- Able to work independently and in multidisciplinary teams

Job Description

Within Gow Groundworks, Arjen is responsible for a range of technical and operational tasks, including managing machine-control data for diggers, dumpers, graders, and other equipment. His duties involve coordinating the preparation of 3D design models for field implementation, addressing machine-control issues such as plant and equipment calibration (including bucket position and height), and troubleshooting defects within the machine-control system, such as cable and sensor faults. In addition, he supports site-setting out and surveying activities, including drainage, kerbing, building-line layouts, and the associated mapping and documentation
